

C-Star 10 cm leak-resistant flow tube

Product #:

FAS-000035

USD Price:

Contact Sea-Bird

C-Star transmissometer

The C-Star transmissometer has a novel monolithic housing with a highly integrated opto-electronic design to provide a low cost, compact solution for underwater measurements of beam transmittance.

Rugged design

Can be used for profiling, moored, or shipboard applications

Shipboard application option

Flow tubes allow for pumped, flow-through data collection

Two output types

14-bit digital or analog

Output is calculated beam attenuation
